## PROJECTS

### Online Diagnostic Lab Reporting System (ODLRS) – On Going

WEB APPLICATION

FEB 2019 – PRESENT

This is a "Web Application" management system. Patient booking for any type test from home. They don't need to physically attend for booking test. Where I'm using "ReactJS" for building user-interface with my team.

### Food Service

WEB APPLICATION

NOV 2018 – PRESENT

This is an open source web application for ordering homemade food cooked by housewives. Where I am developing "Front-End" section. This system will be based on the smartphone app in the future. It'll be also based on distributive architecture like Uber. We just developed the web version for a demo. It's my personal project maintaining by our team named 'DevsCave'. This application will be very helpful for the students of Dhaka city who are living outside from home and don't able to consume homemade food.
